A Eraser

Activating

The ProWrite Pen will be delivered inactive to keep the battery fully charged. Before use please activate the pen by:

- Press the top button (A) and hold this button down
- Simultaneously, press the Up/Down button in the following sequence: Down (v), Up (∧), Down (v), Up (∧)
- LED (B) turns green, indicating the activating process has succeeded.
- If failed, please repeat the above steps

∧ Up

B LED Indicator

v Down

Connecting

The ProWrite Pen is already connected to your Pro Line touchscreen upon receipt. Before use simply activate the pen. However, in case the ProWrite Pen is not working, please try connecting the pen again to reestablish the connection:

- Simultaneously, press the top button (A) and the Up button (∧) for 2 seconds
- LED (B) will start flashing green rapidly
- Hold the pen near the ProWrite antenna, located at the top right hand corner of the touchscreen
- LED (B) will flash 3 times at a slow pace, indicating the connection has succeeded
- If failed, please repeat the above steps

Deactivating

- Press the top button (A) and hold this button down
- Simultaneously, press the Up/Down button in the following sequence: Up (∧), Down (v) Up (∧), Down (v)
- LED (B) turns red, indicating the deactivating process has succeeded
- If failed, please repeat the above steps
- To check this: Press Top button (A), when LED (B) is dimmed red, the ProWrite Pen is deactivated

Charging - LED indications

When the activated ProWrite pen is in the pen tray:

- Flash red-green: Battery is charging
- Solid red: Battery is fully charged
- No light: Battery is empty

C Pressure sensitive
