

Prowise PC Module v/s Screen type

Which PC Module can be used with a specific screen range

Prowise MT01

The Prowise MT01 module can be used in the following screens:

- Prowise screens starting with TE
- Prowise screen starting with K (classic line)
- Prowise Proline (not recommended)
- Prowise Entry line Gen 1 (not recommended)

*If the customer wants to upgrade his MT01 to an MT06, in some cases the cover plate should be replaced to make room for the spacers (only the oldest screens have spacers installed next to the connector, which requires a larger hole in the pack of the cover plate), this option is only available for the MT06. If the customer wants to upgrade to an MT10, the spacers inside the screen should be removed. **An On-Site visit will be required.***

MT01 With spacers

MT06 with retrofit cover plate

MT06 with original cover (no room for the spacers inside the screen)

- This device is designed for Windows 7. It is not recommended to install Windows 10 on this module because optimal performance cannot be guaranteed.

Prowise MT06

The Prowise MT06 module can be used in the following screens:

- Prowise screens starting with TE
- Prowise screen starting with K (classic line)
- Prowise Proline
- Prowise Entry line Gen 1

Prowise MT10

The MT10 range includes:

- MT10 non Vpro
- MT10 Vpro
- Education Entry (i3)
- Education (i5)
- Business (i7)

The Prowise MT10 module can be used in the following screens:

- Prowise screens starting with TE
- Prowise screen starting with K (classic line)
- Prowise Proline (not recommended)
- Prowise Entry line Gen 1

Prowise MT21 (120 Pins connector)

The Prowise MT21 module can be used in the following screens:

- Prowise Entry line Gen 2 Only

Prowise OPS (80 Pins connector)

The Prowise OPS (80 pins) first to fourth generation module can be used in the following screens:

- Prowise Proline+
- Prowise Touchscreen
- Prowise Touchscreen One (first and second generation)

- Prowise Touchscreen Ten (first and second generation)
